DETAILED ACTION

1. Claims 1-44 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35 and 41-44, drawn to receiving electronically transmitted debit transaction information, classified in class 705, subclass 39.
 - II. Claims 36-40, drawn to providing an account holder with a debit card, classified in class 235, subclass 380.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as receiving the electronically transmitted debit transaction information, recalling the debit transaction information, and storing the debit transaction information without automatically debiting the debit transactions against the account and invention II has separate utility such as providing the account holder with a debit card, producing on a scheduled date a statement, making the statement available to the account holder, and automatically debiting the financial institution account. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3624

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
